Néstor Andrés Rossil Chamale

Senior Business Intelligence, ERP & Enterprise Solutions Consultant

LinkedIn: https://www.linkedin.com/in/andres-rossil-9b958364/

Portfolio: https://andresrossil.github.io/

Professional Summary

Consultant with over 13 years of experience in business intelligence, ERP systems and enterprise solutions. Combines requirements and process analysis with the design and implementation of data platforms, reporting solutions and applications. Experience with SAP Business One, SQL Server, Power BI and Power Apps, with participation in SAP S/4HANA implementation. Focused on reliable information for decision-making and measurable operational improvements.

Technical Skills

Business Intelligence: Power BI, Power Query, SSRS and Crystal Reports.

Data: SQL Server, T-SQL, stored procedures, SSIS, ETL/ELT, data modeling, Data Warehouse and Data Marts.

ERP: SAP Business One; SAP S/4HANA: master data, MM, SD, Security, Roles and Fiori within implementation activities.

Applications and Automation: Power Apps, SQL Server Agent, SSRS Subscription XML, advanced Excel connected to SQL.

Professional Experience

ERP Specialist | Arium

August 2025 – Present

- Create and maintain SAP S/4HANA master data and provide functional support for MM and SD.
- Support SAP S/4HANA implementation through process analysis, testing and user validation; participate in Security, Roles and Fiori activities.

BI & Data Solutions Consultant | Arium

November 2017 – August 2025

- Built the corporate BI platform from the ground up together with the manager, including centralized databases, data models and more than 20 SSIS ETL processes.
- Developed more than 50 Power BI dashboards and more than 50 reports using SSRS and Crystal Reports for finance, sales, logistics and operations.
- Designed the SQL Server data architecture with a persistent raw data layer, load traceability, SSIS/T-SQL transformations, a Data Warehouse and Data Marts.

Professional Experience Continued

BI & Data Solutions Consultant | Arium continued

- Automated SSRS report distribution using SSRS Subscription XML, stored procedures and SQL Server Agent, with dynamic recipients, content and parameters driven by SQL data and business actions.
- Designed Power Apps and SQL applications for inventory counts, picking, auditing, freight and deliveries. These logistics solutions helped improve Inventory Record Accuracy (IRA) from approximately 50% to 98%; online counting and recounting enabled completion of the W2W cycle in two days.
- Defined logistics integration requirements for SAP Business One APIs implemented by third parties and continued providing SAP Business One support.

SAP Business One Administrator | Arium

November 2015 – November 2017

- Participated in SAP Business One implementation, including opening balance uploads, account and rule configuration, and go-live support.
- Administered SAP Business One and its SQL Server databases; developed reports using Crystal Reports, queries, stored procedures, formatted searches and approval procedures.
- Provided ERP support and process improvements.

IT Coordinator | Granjazul

January 2013 – November 2015

- Provided SAP Business One support and developed a poultry production integration in VB.NET, automating raw material consumption and finished goods receipt transactions in SAP Business One; addressed occasional IT infrastructure needs.

SAP Business One Support | SCI

January 2012 – December 2012

- Provided SAP Business One support and assisted with consulting activities.

SAP Business One Experience Across Roles

Cumulative experience in SAP Business One implementation, technical and functional configuration, administration and customization for approximately 10 companies, primarily on SQL Server. Configured purchasing, sales and inventory processes, account determination, authorizations, business rules and controls using SQL and TransactionNotification. Experience with SAP Business One on HANA and participation in migration and support activities.
